Forecast for Sunday 21 Aug 2022

Weather: Mostly cloudy during the morning but a few brighter periods are possible. Thicker cloud during the second half of the day will bring a chance of drizzly showers, but drier periods of weather are still likely. Possibly some longer periods of drizzle developing by the evening.

Chance of cloud-free hill tops above 600m: 70%.

Low cloud and visibility: Patches of cloud above 600-700m, especially during the drizzly showers. However lengthy periods where the cloud will be just above the summits. Mostly good visibility during the daytime but poor in drizzly showers and very poor in cloud.

Meteorologist's View

The best chance of any brightness/sunshine will be during the first half of the morning. Feeling increasingly warm and humid by the evening.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Sat 20 Aug 2022	0.4mm	5.4mm	5.4mm

Forecast for Monday 22 Aug 2022

Weather: Low cloud and occasional rain and drizzle during the early hours and at first in the morning. Slowly brightening up but with a chance of showers breaking out. These will be locally heavy with a low chance of thunder. Sunnier spells developing later in the day. Humid and feeling warm and muggy in any brighter periods.

Maximum wind: South-westerly 20 mph gusting 25-30 mph on highest summits.

Chance of cloud-free hill tops above 600m: 20% becoming 60%.

Low cloud and visibility: Extensive cloud above 400-500m during the morning, becoming patches above 600-700m from midday onwards. Widely poor at first but becoming generally good. Remaining widely very poor in cloud and occasionally poor at all levels as showers pass through.

Temperature: **Valleys:** Plus 16 Celsius rising to plus 22 Celsius.
At 600m: Plus 16 Celsius.
Freezing level: Well above the summits.
